Fuel tank	315 L
Double steering	Yes
Other equipment	220-volt shore power supply, Boarding ladder + outdoor shower, DVD player, Radio CD/MP3, Terrace with garden furniture

Estivale Quattro S

304,000€

With its large sleeping quarters and plenty of storage space, this model offers a remarkable amount of space and exceptional comfort.

What sets this river cruiser apart is its fore cabin. There you will find **spacious sleeping quarters** with plenty of storage space and a superb bathroom (including a built-in shower stall). The Quattro S boat also has a second cabin for children or guests.

It comes with an aft **terrace** window level with the living quarters (access via a large sliding bay door), a popular feature that is also included with the Sedan range.

The aft terrace enjoys a deck saloon for outdoor dining, and is equipped with a sun awning if you need protection from the rays!

Also to the aft is the classic gate enabling wide access from a jetty to the terrace. The Estivale range has an extra advantage: two side gates, moulded into the hull, have been added to make it easier to get off the boat from the sides. Highly practical, particularly for "wild" mooring! Simply lay the gangway to disembark onto the bank. Access to the roof solarium is gained via a moulded stairway + handrail (for comfort and security).

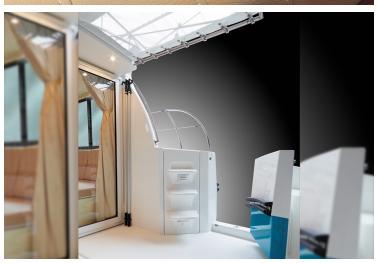

The upper deck offers a second jet-ski-style "collapsible" cockpit to facilitate its use while seated on the bench. To the fore of the boat, a second small terrace moulded into the hull offers a bench and table to make the most of an unobstructed view of the river while sailing.

Lastly, there is a wide range of equipment on board to ensure the greatest possible convenience: 220-Volt shore power supply, boarding ladder, etc...
